## 6 REASONS TO CHOOSE WHEAT STRAW AMENITIES

1. They are made of renewable sources, instead of fossil fuel, such as oil;
2. They are 100% recyclable;
3. Wheat straw is a residue after wheat harvesting. Its use in the production of plastics provides an ideal zero-waste solution;
4. Its production requires less energy than production of regular plastics;
5. Its production emits less greenhouse gasses than production of regular plastics;
6. Wheat absorbs more carbon dioxide than it releases in the atmosphere, thus contributing to a carbon neutral product.
